Application US/09151189

Sequence 9. Application US/09151189

Sequence 9. Application US/09151189

GENERAL INFORMATION:

APPLICANT: Vreeland.

APPLICANT: The Regents of the University of California

TITLE OF INVENTION: Recombinant Vanadium Haloperoxidases and Their Uses

CURRENT APPLICATION NUMBER: US/09/151,189

CURRENT PILING DATE: 1998-09-10

NUMBER OF SEQ ID NOS: 11

SOSTWARE: Patentin Ver. 2.0

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 6232457

GENERAL INFORMATION:
APPLICANT: Vreeland, Valerie
APPLICANT: The Regents of the University of California
TITLE OF INVENTION: Recombinant Vanadium Haloperoxidases and Their Uses
FILE REFERENCE: 023070-087100VS
CURRENT APPLICATION NUMBER: US/09/151,189
CURRENT FILING DATE: 1998-09-10
NUMBER OF SEQ ID NOS: 11
SOFTWARE: PatentIn Ver. 2.0
SEQ ID NO 1
LENGTH: 2931
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               MetLeuCysHisAlaAlaAspThrThrArgGlySerProMetProAspThrGlyValLeu 20

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Description
